RE: Applications for Permit to Drill

Gentlemen:

Enclosed, in duplicate, are Applications for Permit to Drill (Form 3) for the following wells in Carbon/Emery Counties, Utah.

Clawson Spring State, Wells B-6, H-1, H-2, IPA-1, IPA-2, J-1 Pierucci 1 and Potter et l 1

Please call me at (281) 874-8766 if you require further information or have any questions.

Sincerely,

Judy Davidson Regulatory Analyst

DIVISION OF OIL, GAS AND MINING

DRILLING PLAN TO ACCOMPANY APPLICATION FOR PERMIT TO DRILL

Company: Anadarko Petroleum Corporation

Well: Potter et al 1

0

Location: 1355 FN

1355 FNL& 1326 FEL

Lease:

T15S R8E Sec. 35 Carbon County, Utah

Surface Elevation: 6944

A. Estimated Tops of Important Geologic Markers:

GEOLOGIC MARKER	<u>DEPTH</u>
Emery	Surface
Bluegate Shale	2594
Ferron SS Member	3694
Ferron Coal Top	3719
Base of Ferron Coal	3869
Tununk Shale	3929

B. <u>Estimated Depth at which Water, Oil, Gas or other Mineral-Bearing zones are expected to be encountered:</u>

Gas-bearing Ferron Sandstone Member is expected to be encountered from:

3694 - 3869.

All fresh water zones and prospectively valuable mineral zones encountered during drilling will be recorded by depth and adequately protected. All oil and gas shows will be tested to determine commercial potential.

C. Pressure Control Equipment:

A 9" 3000 psi WP double gate hydraulic BOP with pipe rams and blind rams will be installed on the 8-5/8" casinghead. In addition to the BOP stack, a rotating head will be installed on top of the BOP to assist in safe air drilling operations. The BOP stack will be tested prior to drilling below surface casing. The ram preventers will be tested to 70% of the working pressure of the casinghead. The annular will be tested to 50% of its working pressure. Operational checks will be made daily or on trips. A BOP schematic is shown on attached Exhibit "A".

The BOP system will be consistent with API RP 53. Pressure tests will be conducted before drilling out from under all casing strings which are set and cemented in place. Blowout preventer controls will be installed prior to drilling the surface casing plug and will remain in use until the well is completed or abandoned. Preventers will be inspected and operated at least daily to ensure good mechanical working order. This inspection will be recorded on the daily drilling report. Preventers will be pressure tested before drilling casing cement plugs. The accumulator system will meet IADC guidelines concerning pump capacities, storage capacity, and reservoir volume. Closing unit fluid volume will be sufficient to pre-charge the system to operating pressure plus 50% excess. One set of controls will be in the doghouse on the rig floor and one set will be remote on the drilling pad.

D. Casing Program

Surface Casing:

8-5/8", 24#, J55, LTC new casing will be set at approximately 300'.

Production Casing:

5-1/2" 17#, N80, LTC, new casing will be set at TD if productive.

D. Casing Program (continued)

Casing Design Factors

The safety factors on casing strings will equal or exceed the following values:

Collapse

1.0

Joint Strength

1.6

Burst

1.33

E. Cement Program

Surface -

Cement will be circulated to the surface. Casing will be cemented with

approximately 200 cu. ft. of API Class 'G' cement.

Production -

Casing will be cemented with approximately 300 cu. ft. of API Class 'G" cement. The actual cement volume will be based upon hole depth and gauge, and will be

determined from logs.

Additional additives will be used to retard the cement, accelerate the cement, control lost circulation, or control fluid loss. All cementing will be done in accordance with API cementing practices.

F. <u>Mud Program and Circulating Medium:</u>

A truck-mounted air drilling rig will be used to drill the surface hole to 300' and to pre-set the surface casing before moving a drilling rig on location to drill the rest of the hole to TD. An air or air/mist system will be used for drilling from below surface pipe at 400' to TD. The mud/fluid system will be monitored visually and with a gas chromatograph detector.

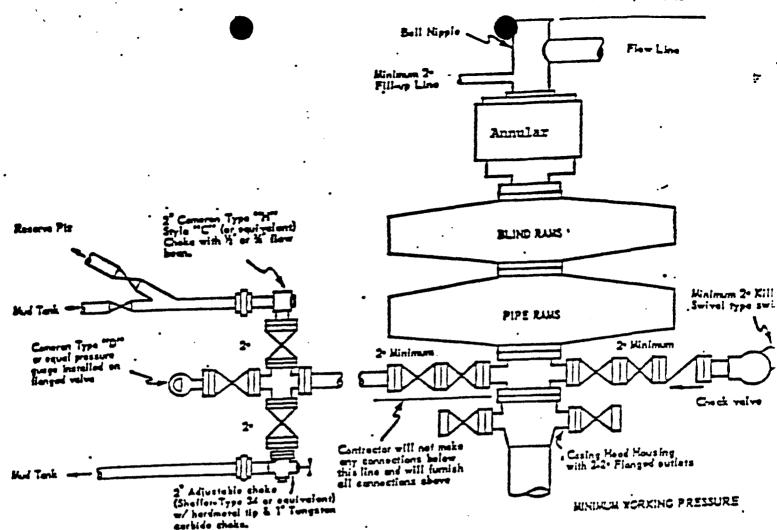

G. Coring, Logging, and Testing Program:

- a. Rotary sidewall coring in the Ferron Sandstone interval may be performed, depending upon shows and hole conditions.
- b. DST's may be run depending upon shows.
- c. The following logging program is planned:
 - 1. SDL-GR-CAL over prospective intervals..
 - 2. DIL- SP-GR-CAL over prospective intervals
- d. A mud logging unit with chromatograph will be used from approximately 1000' to TD.
- e. After production casing is installed, a cement bond log will be run to determine the top of cement. Productive zones will then be perforated and swab tested. Water produced during testing will be contained in the temporary reserve pit. All produced oil will be stored and sold. Gas will be flared during testing.

H. Abnormal Conditions and Potential Hazards:

Abnormal conditions such as abnormal temperatures or pressures are not anticipated. Potential hazards such as H2S are also not anticipated.

SURFACE LAND USE AGREEMENT

KNOW ALL MEN BY THESE PRESENTS, THAT:

WHEREAS, Potter Oasis, L.C., whose mailing address is 2223 North 1200 West, Price, UT 84501 (hereinafter referred to as GRANTOR, whether one or more), is the owner of the surface of the following described property, to-wit:

TOWNSHIP 15 SOUTH, RANGE 8 EAST, SLM

Section 35: N1/2SE1/4, SW1/4SE1/4, SE1/4SW1/4, NE1/4SW1/4, SE1/4NE1/4, ALSO beginning at the SW corner of the NE1/4, and running thence North 500 feet; thence East 261.36 feet; thence South 500 feet; thence West 261.36 feet, to beginning.

ALSO beginning at a point 550 feet East of the NW corner of the NE1/4, and running thence East 220 feet; thence South 1672 feet; thence West 220 feet; thence North 1672 feet to beginning.

ALSO beginning at the NE corner of the NW1/4NE1/4, and running thence South 2640 feet; thence West 1058.64 feet; thence North 500 feet; thence East 210.64 feet; thence North 922 feet; thence West 54 feet; thence North 418 feet; thence East 132 feet; thence South 872 feet; thence East 220 feet; thence North 1378.30 feet; thence East 293.70 feet; thence North 293.70 feet; thence East 256.30 feet to beginning.

See Exhibits "A", "B" and "C" Attached

and Anadarko Petroleum Corporation whose address is PO Box 1330, Houston, TX 77251-1330, (hereinafter referred to as GRANTEE), owns leases covering oil, gas and mineral rights in, under and upon said property; and

WHEREAS, Grantee desires to build access roads, pipelines and appurtenances thereto, power lines, and well sites for the drilling of Coalbed Degasification wells on a portion of said property.

NOW THEREFORE, for and in consideration of the sum of ten dollars (\$10.00) and other valuable considerations, the receipt and sufficiency of which is hereby acknowledged, Grantor does hereby grant, sell and convey unto Grantee, its successors and assigns, the easement and right to use that portion of the herein above described property as may be necessary to conduct its drilling and production operations of said property, including the right to construct and maintain coalbed methane gas well sites; to construct, entrench, maintain, operate, replace, remove, protect, or abandon a pipeline or pipelines for water or gas with appurtenances thereto, including, but not limited to, valves, metering equipment, and cathodic equipment; to construct, maintain or cover up any pits or ponds necessary for drilling operations or water storage; to erect, maintain, relocate, replace or remove production facilities, including, but not limited to, pumps, compressors, separators, treater, etc.; to construct, maintain, relocate, or abandon roads, and in connection therewith, a power line or power lines (said wellsites, pipelines, appurtenances, valves, metering equipment, cathodic equipment, roads and power lines being sometimes collectively called the "facilities") over, under and through the hereinafter described land as described in the attached Exhibits "A" and "B".

OCT 0 3 2000

Grantor acknowledges the receipt and sufficiency of the above described consideration as payment for all damages to Grantor's trees, timber, growing crops, and other vegetation being cultivated on said land by the undersigned or their respective lessees, tenants or assigns caused by the construction, maintenance, protection, repair, placement or removal of the facilities as described in the attached exhibits and agrees that the payment and acceptance of the consideration set forth above is in full and complete payment, settlement, compromise and satisfaction of any and all of the above-mentioned losses, liabilities, claims, damages, demands and causes of action for any and all injuries and damage to the surface of the land hereinbelow described and to any appurtenances or improvements thereon, and for any and all claims including but not limited to loss of potential rental income, damages to and/or loss of livestock and wildlife, arising directly or indirectly in connection with the operations thereon by Grantee, its employees, agents, contractors, or subcontractors in connection with the above-mentioned operations of Grantee.

Grantee shall have the free right of ingress and egress to, over, upon, through and across said right-of-way and easement for any and all purposes that may be necessary or incidental to the maintenance of the right-of-way and easement, with the right to use existing roads which enter Grantor's property for the purpose of constructing, inspecting, repairing and maintaining the facilities and the removal or replacement of same at will, either in whole or in part, and the replacement of said pipeline or pipelines with either like or different size pipe. During temporary periods, Grantee may use such portions of the property along and adjacent to said right-of-way as may be necessary in connection with construction, maintenance, repair, removal or replacement of the facilities and if such use cause any damages to Grantor's lands outside of the above described right-of-way, Grantee shall pay Grantor for such damages.

Grantor reserves the right to the use and enjoyment of said property except for the purposes herein granted, but such use shall not hinder, conflict or interfere with Grantee's surface or subsurface rights hereunder or disturb its facilities. No road, reservoir, excavation, obstruction or structure shall be constructed, created or maintained on, over, along or within the lands covered by this right-of-way without Grantee's prior written consent.

If Grantee desires to remove any trees adjacent to said right-of-way at a later date which may be hazardous to the maintenance and use of the facilities on the right-of-way, Grantee shall first obtain approval from Grantor in writing, Grantor's approval not to be unreasonably withheld, and after receipt of such approval, may proceed to cut and remove such trees subject to payment of additional timber damages, if any are determined.

The undersigned hereby covenant and warrant that they are the surface owners of the above described land, and have the right to enter into this agreement.

FOR THE SAME CONSIDERATION RECITED ABOVE, Grantor and Grantee do hereby release, discharge and acquit the other from any and all liability, and shall indemnify the other against any and all claims and demands for damages, attorneys fees, injury or loss, existing now or done hereafter, to the surface of said lands or to any third parties arising out of or being the result of their or, their agents, contractors, licensees, permittees, successors and assigns own activities on or use of the subject property. However, such parties' potential liability under this paragraph to the other shall be limited to the acts and/or omission of it, or its predecessors, agents, contractors, licensees, permittees, successors, and assigns, and shall not include any acts and/or omissions of the other party, its agents, contractors, licensees, permittees, successors or assigns. Grantee shall reasonably maintain the subject property in order to prevent unnecessary deterioration of the surface and to keep the property in an unlittered condition.

TO HAVE AND TO HOLD the above described rights and easements, together with all rights necessary to operate and maintain the facilities over the right-of-way hereby granted the facilities over the right-of-way and easement is abandoned under

OCT 0 3 2000

the terms stipulated herein. The Grantee may assign the rights and easements herein granted, either in whole or in part, subject to the terms of this grant, and such rights and easements shall be covenants running with the land and be binding upon Grantor, Grantor's heirs, legal representatives and successors in title. Upon abandonment, at the request of the Grantor, Grantee shall execute and deliver to Grantor a document in recordable form evidencing said abandonment.

The making, execution and delivery of this document by Grantor has been induced by no representations, statements, warranties, or other agreements other than those herein expressed. This agreement embodies the entire understanding of the parties, and this instrument may be amended or modified only by subsequent written agreement of the parties.

This agreement is subject to Special Stipulations as described on the attached Exhibit "C". In the event of conflict between the terms of the main body of the Agreement and the Special Stipulations described on the attached Exhibit "C", the Special Stipulations control.

This agreement shall inure to the benefit of the parties hereto, their heirs, successors, and assigns and shall be a burden running with the land.

IN WITNESS WHEREOF, this Surface Land Use Agreement may be executed in any number of counterparts, and each such counterpart hereof shall be deemed to be an original instrument, but all such counterparts together shall constitute for all purposes one instrument executed as of the dates of the respective acknowledgments of the parties hereto, but being effective as of the 9th day of August, 2000.

EXHIBIT "C" SPECIAL STIPULATIONS

Attached to and made a part of that certain Surface Land Use Agreement effective the 9th day of August, 2000, by and between Potter Oasis, L.C., as Grantor, and Anadarko Petroleum Corporation, as Grantee.

- 1. Each pipeline and power line installed hereunder shall be constructed not less than five (5) feet below the surface elevation of said land at the time of construction, provided that subsoil and subsurface conditions will permit a pipeline or power line to be constructed at this depth using normal construction methods. In the event that rock or other subsoil or subsurface conditions, including other previously laid pipe or other lines, do not permit a pipeline or power line to be constructed at this depth by normal construction methods, each pipeline or power line constructed hereunder shall be constructed at the lowest depth above the five (5) feet minimum depth specified above that normal construction methods will permit. It is agreed and understood that there is no obligation on the part of Grantee to bury power lines. Grantor, its successors or assigns, shall give reasonable notice to Grantee before crossing a pipeline or power line at locations other than existing roadways so that Grantee may instruct Grantor on what measures must be taken by Grantor to protect such facilities from damage.
- 2. It is hereby understood and agreed that by the execution of this agreement, Grantee does not serve to waive, forfeit, or limit any rights it may have by virtue of the mineral Lease(s) active on the subject properties and shall not be deemed as a limitation on additional surface use if further mineral development is contemplated. If the need for such additional surface use arises, Grantor and Grantee agree to negotiate in good faith to reach an agreement substantially similar in form to this agreement for such use.
- 3. Cattle guards shall be installed by Grantee wherever roads shall go through any fences located on Grantors lands that are subject to this Agreement.
- 4. Grantee shall have the right at any time, but not the necessity, to remove or abandon in place all machinery, fixtures, power lines and pipelines placed on or in said land, including the right to draw and remove casing. In no event shall Grantor be due any further damages for Grantee's efforts to restore the surface of the subject lands.
- 5. All roads shall be constructed with appropriate ditches and drain culverts to allow proper drainage off of said roads and also to prevent water from backing up along said roads, all at the sole expense of Grantee. Roads shall be treated with magnesium chloride as needed.

PARTICIPANTS

Chris Kierst, (DOGM), Jim Hartley (Anadarko), David Kay (Uintah Engineering), Neal and Leona Frandsen, J. Mac Potter, Diana Ware Potter (surface, mineral or access owners).

REGIONAL/LOCAL SETTING & TOPOGRAPHY

This area is on the western margin of Colorado Plateau. The location is ~1 miles east of the foot of the Wasatch Plateau. It is ~\frac{1}{4}\$ mile north of upper Washboard Wash and ~\frac{3}{4}\$ mile southeast of Miller Creek.; ~\frac{2}{4}\$ miles west southwest of Clawson Spring. The Hiawatha tailings pond may be found ~\frac{1}{2}\$ mile west of the location. The pad is on open surface, over alluvium, which gently slopes to east. Small dry washes pass by within several hundred feet on the north and south. These drain east into Washboard Wash. The road to Hiawatha UT is ~\frac{1}{4}\$ mile north and Hiawatha UT is ~\frac{1}{4}\$ miles west. Mohrland UT is ~\frac{3}{4}\$ miles southwest.

SURFACE USE PLAN

CURRENT SURFACE USE: Grazing and wildlife habitat.

PROPOSED SURFACE DISTURBANCE: The operator proposes 270' X 155' pad, outboard soil storage, a 30' X 80' X 10' inboard pit, ~9/10 mile of upgrade to extant trail and 300' of new access road.

LOCATION OF EXISTING WELLS WITHIN A 1-MILE RADIUS: 3 NEW status, 1 APD status and 3 DRL status Anadarko CBM production or salt water disposal locations.

LOCATION OF PRODUCTION FACILITIES AND PIPELINES: <u>~6 miles east of the pad (Questar pipeline runs north-south)</u>. Buried power line and gathering systems follow new or existing upgraded access roads. Production facilities include a pumpjack, separator enclosure, casing and tubing strings,

well head, telemetry equipment and transformer.
SOURCE OF CONSTRUCTION MATERIAL: gravel location and approach road; soil stored in berm,
the location will be made of natural material borrowed from leveling the pad during construction.
ANCILLARY FACILITIES: none
WASTE MANAGEMENT PLAN:
Portable toilets; garbage cans on location will be emptied into centralized dumpsters which will be
emptied into an approved landfill. All human waste generated at the site will be kept in proper sanitary
facilities and disposed of according to local rules. A waste management program has been filed for the
year 2000 drilling season however it is written to cover production and is not sufficient to cover the
drilling phase of operations. Extra precautions will be taken due to the proximity of Sand Wash.
ENVIRONMENTAL PARAMETERS
AFFECTED FLOODPLAINS AND/OR WETLANDS: The area drains to intermittent Washboard
Wash and eventually into the Price River ~17 miles to the east.
FLORA/FAUNA: Pinyon, juniper, sagebrush, grasses, cactus, birds, lizards, coyotes, rodents, raptors,
occasional elk and deer (critical winter range).
SOIL TYPE AND CHARACTERISTICS: Sandy, silty, moderately permeable soil developed on
Quaternary / Tertiary Pediment Mantle covering the Blue Gate Shale Member of the Mancos Shale.
(GP-SP-ML)
SURFACE FORMATION & CHARACTERISTICS: Quaternary / Tertiary Pediment Mantle overlying
the upper portion of the Blue Gate Shale Member of Mancos Shale; light gray, bentonitic shale and
sandstone ledges.
EROSION/SEDIMENTATION/STABILITY: Stable.
PALEONTOLOGICAL POTENTIAL: None observed.
TABLETA CONTENT OF MAINTEN TONG COOLING.

RESERVE PIT

CHARACTERISTICS: Dugout, earthen pit, as above.

LINER REQUIREMENTS (Site Ranking Form attached): Synthetic liner is required.

SURFACE RESTORATION/RECLAMATION PLAN

As per the terms of the Surface Owner's Agreement.

SURFACE AGREEMENT: Affidavit of existence of Surface Owner's Agreement on file with DOGM.

CULTURAL RESOURCES/ARCHAEOLOGY: Archaeological survey completed and on file with State.

OTHER OBSERVATIONS/COMMENTS

2 private culinary water wells are within 800' of location.

ATTACHMENTS:

4 Photographs taken.

DISION OF OIL, GAS AND MINING APPLICATION FOR PERMIT TO DRILL STATEMENT OF BASIS

Operator Name: Anadarko I	<u>Petrole</u>	um C	orp	<u>oratior</u>	<u> </u>			
Name & Number: Potter et a	al #1	··· p =						
API Number: <u>43-007-30728</u>		···						
Location: 1/4 1/4 SW/NE	Sec	35	т	15 S	R	8 F	County: Emery	

Location: 1/4, 1/4 OVINE __ 0ec. ____ 1. ___ 10 0 11. ___ 0 E_ 00unty. __

Geology/Ground Water:

It is not expected that aquifers containing significant volumes of high quality ground water will be penetrated. A moderately permeable soil is developed on Quaternary / Tertiary Pediment Mantle covering the Blue Gate Shale Member of the Mancos Shale. The Emery Sandstone Member of the Mancos Shale is likely in the subsurface at this location and may contain a minor ground water resource. The proposed casing and cementing programs should adequately isolate any zones of fresh water that may be penetrated but the operator must extend the surface casing setting depth as needed to completely contain all Emery Sandstone Member strata. This well may penetrate upper, middle and lower Emery Sandstone Member strata.

Reviewer: Christopher J. Kierst Date: 9/28/2000

Surface:

There are 5 water wells within a mile of the location and 2 wells exist within 800' of the location. The water wells are of unknown depth but are most likely very shallow, anecdotally, hand dug. There is also a remote possibility that these involve some sandstone in the Emery Sandstone member of the Mancos Shale. The nearest moving surface waters are in Miller Creek ~½ miles northwest. The Hiawatha tailings pile is ~½ mile west. Surface water may be found at Clawson Spring ~2½ miles east. The site was photographed and characterized on 9/22/2000. Provision was made to ensure site rehabilitation, litter and waste control, preservation of drainage patterns and the integrity of local infrastructure, groundwater and other resources. The surface is stable. Well utilities and the water gathering system will follow the approach roadway. There are no wildlife issues besides winter drilling restrictions from December 1st to April 15th of each year. The operator has elected to abide by those restrictions unless the Division of Wildlife Resources grants an exemption or waiver. Precipitation will be diverted around the location into the existing gullies and berms will be established to keep pollutants from entering or leaving the well pad.

Reviewer: Christopher J. Kierst Date: 9/28/2000

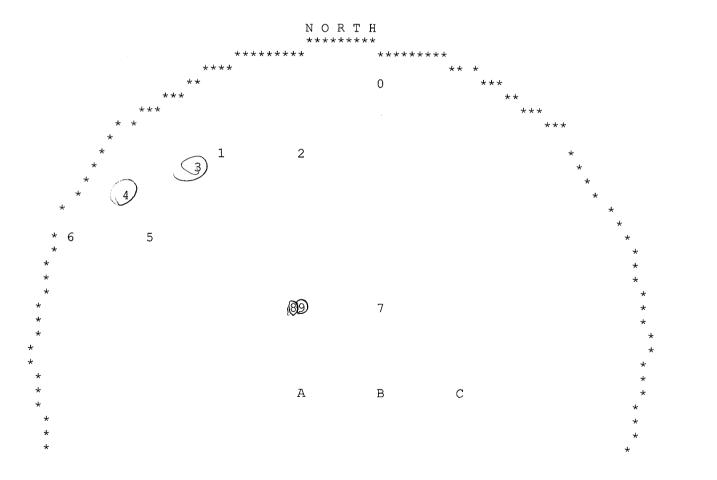

Conditions of Approval/Application for Permit to Drill:

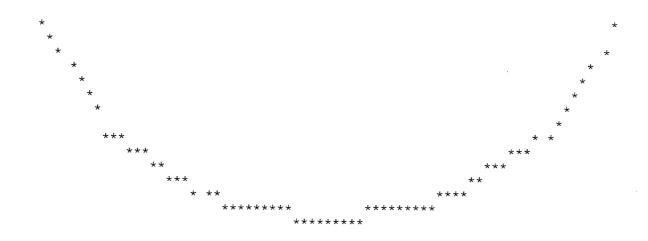

- 1. A 12-mil minimum thickness synthetic pit liner is required.
- 2. Berms and diversions to protect the location and spoil piles and control erosion and pollution.
- 3. Dust suppression while air drilling.
- 4. Surface casing will be set through all Emery Sandstone Member strata.
- 5. Site infrastructure placement as per drilling location plat.

Re:

Potter et al 1 Well, 1355' FNL, 1326' FEL, SW NE, Sec. 35, T. 15 South, R. 8 East,

Carbon County, Utah

Gentlemen:

Pursuant to the provisions and requirements of Utah Code Ann.§ 40-6-1 et seq., Utah Administrative Code R649-3-1 et seg., and the attached Conditions of Approval, approval to drill the referenced well is granted.

This approval shall expire one year from the above date unless substantial and continuous operation is underway, or a request for extension is made prior to the expiration date. The API identification number assigned to this well is 43-007-30728.

Sincerely,

John R. Baza

Associate Director

Conditions of Approval

1. General

Compliance with the requirements of Utah Admin. R. 649-1 *et seq.*, the Oil and Gas Conservation General Rules, and the applicable terms and provisions of the approved Application for permit to drill.

2. Notification Requirements

The operator is required to notify the Division of Oil, Gas and Mining of the following actions during drilling of this well:

- 24 hours prior to cementing or testing casing
- 24 hours prior to testing blowout prevention equipment
- 24 hours prior to spudding the well
- within 24 hours of any emergency changes made to the approved drilling program
- prior to commencing operations to plug and abandon the well

The following are Division of Oil, Gas and Mining contacts and their work telephone numbers (please leave a voice mail message if the person is not available to take the call):

- Dan Jarvis at (801) 538-5338
- Robert Krueger at (801) 538-5274 (plugging)
- Carol Daniels at (801) 538-5284 (spud)

3. Reporting Requirements

All required reports, forms and submittals will be promptly filed with the Division, including but not limited to the Entity Action Form (Form 6), Report of Water Encountered During Drilling (Form 7), Weekly Progress Reports for drilling and completion operations, and Sundry Notices and Reports on Wells requesting approval of change of plans or other operational actions.

4. Compliance with the Conditions of Approval/Application for Permit to Drill outlined in the Statement of Basis. (Copy Attached)

Ms. Carol Daniels State of Utah Division of Oil, Gas and Mining 1594 West North Temple, Suite 1210 Salt Lake City, Utah 84114-5801

CONFIDENTIAL

Dear Ms. Daniels:

Please find enclosed 2 copies of logs for the wells listed below. We apologize for any inconvenience this may have caused by sending in the forms 3160-4 without the logs. To keep this from happening again in the future, we have placed the State on automatic distribution with our service companies. Should you require any additional information, please contact me at 281-874-3441.
